

## Comparison Document

**IntelliPRINT**

for Lotus Notes & Domino

## What's New in IntelliPRINT Analytics 4.0

### Feature Comparison - 3.x vs. 4.0

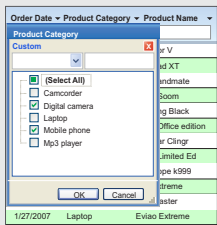

FEATURE	3.x	4.0
Pivot Tables	No	Yes
Filter columns by selecting multiple items	No	Yes
Adding new computed columns	No	Yes
Grouping date columns by pre-defined ranges	No	Yes
Grouping numeric columns by user-defined ranges	No	Yes
Drill down charts	No	Yes
Multiple Charts / Pivots	No	Yes
Automatic sorting of grouped columns	No	Yes
User-defined columns	No	Yes
Quick search bar for each column in the analysis grid	No	Yes
Highlighting an entire row based on conditions	No	Yes
Enhanced full text search	No	Yes
Multiple footer bands for groups	No	Yes
Export to HTML, XML, CSV & Rich Text formats	No	Yes
Document level drill down	Yes	Yes
Customized grid settings	Yes	Yes
API support	Yes	Yes
Launch analysis report with selected documents	Yes	Yes
View linking	Yes	Yes
Adding fields to an analysis report	Yes	Yes
Notes Formulae support	Yes	Yes
IntelliPRINT Analytics for Domino	Yes	Yes

## New Features

Year	2006	2007	2008	Total
Product				
Camcorder	\$6,176,799	\$8,069,532	\$1,657,050	\$15,902,381
Digital camera	\$4,317,094	\$6,387,463	\$1,168,300	\$11,872,857
Laptop	\$10,809,380	\$16,747,550	\$3,084,950	\$30,641,880
Mobile phone	\$4,928,851	\$7,709,672	\$3,268,015	\$15,906,538
Mp3 player	\$21,201,158	\$1,668,963	\$684,450	\$3,554,571
Total	\$27,434,282	\$40,583,180	\$9,862,765	\$77,878,227

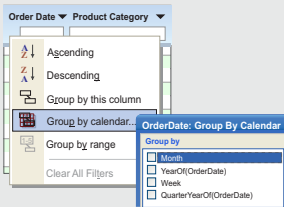

### Pivot Tables

Users now have the ability to create Pivot Tables to summarize and visualize their Notes data using a simple and easy to use drag and drop interface.

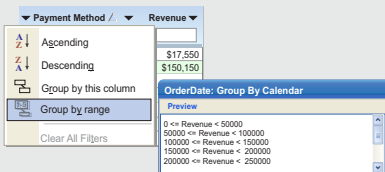

### Multi-Select Filtering of Columns

Users can filter records in a column by selecting multiple items using a check box.

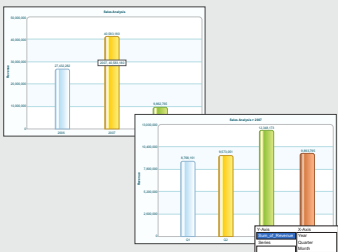

### Automatic grouping of columns with date formats

Any 'Date' column can be grouped by 'Year, Quarter, Month and Week' without the need to use Notes Formulae

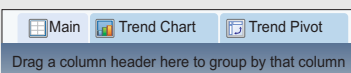

### Grouping by user defined ranges for columns with numeric data

All numeric data columns can be grouped by 'user-defined' ranges. For example, a column with sales data can be grouped as - sales < 50,000, sales > 50,000 & < 100,000 and sales > 100,000, etc.

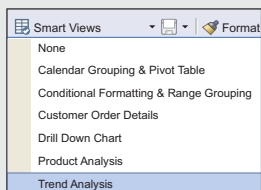

### Drill-down capability in charts

Users can add drill down capabilities to their charts which enable them to easily drill to the next level of detail by clicking on the chart element.

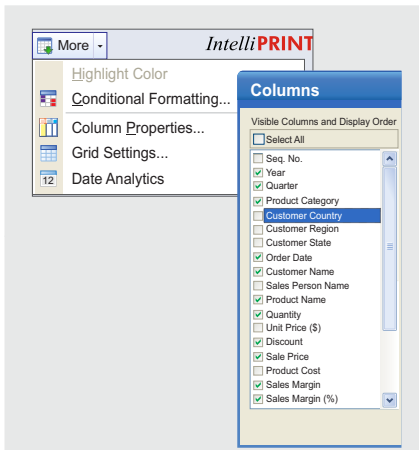

### Multiple charts and pivot tables in a single analysis report

Users can now create multiple charts and pivot tables, presented as Tabs within a single report.

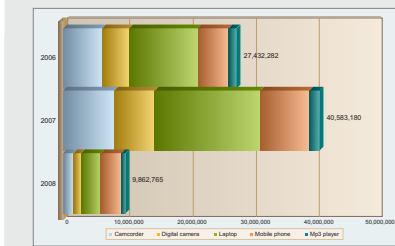

### User defined Notes Views (Smart Views) without the performance impact

Users can create or personalize Notes Views by adding or removing fields, categorize them the way they need, add visualization in the form of charts / pivots and save them as Smart Views. There is no limit on the number of Smart Views because they do not modify existing views or create new views and hence do not impact database performance.

### User-defined display of columns

Users can select columns they would like to see in the analysis grid or unselect columns that are already displayed

### Enhanced Charting

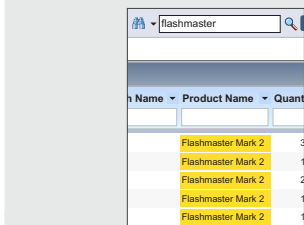

The Charting capability has been completely redesigned and users now have access to a larger array of Chart choices. The Charts have also been enhanced making the reports much more visually appealing.

Drag a column header here to group by that column

Year	Quarter	Product Category	Customer Region
2006	q4	mp3	anz
2006	Q4	Mp3 player	ANZ
2007	Q4	Mp3 player	ANZ
2007	Q4	Mp3 player	ANZ
2007	Q4	Mp3 player	ANZ
2007	Q4	Mp3 player	ANZ

### Enhanced search capabilities

Using the Quick Search Bar above each column in the analysis grid, users can rapidly isolate any information they need by specifying multiple search criteria.

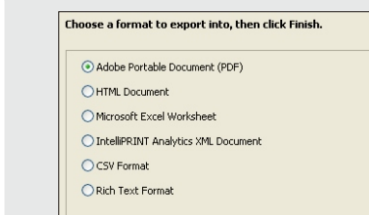

### Support for full text search

Users can search for records that match a particular search criterion using the Notes Full Text Index from right within the Report. The Report will display only the records that match the Full Text search.

Year Of (Order Date)	Count	Revenue
2006 (373 items)	37	\$27,432,282
2007 (467 items)	62	\$40,683,180
2008 (157 items)	13	\$9,862,765

### Multiple Footer Bands for groups

Users can add multiple footer bands for each group in the analytics report. Each footer band can be used to perform different aggregate functions such as, display the count of values, display sum of values, display the greatest value, etc for each individual group.

### Additional export formats

Users can now export their analysis reports to HTML, XML, CSV and Rich Text formats in addition to PDF and XLS formats available in v3.7
