

IntelliPRINT Analytics is an advanced data analysis solution that has been designed specifically for end users of Lotus Notes & Domino applications. It is a native Analysis component within the collaborative Notes & Domino framework and enables end users to transform any Notes view into an analysis model with a single mouse click, and analyze the data within the workflow and security framework of their Notes applications.

This document calculates the Return-On-Investment (ROI) derived by using IntelliPRINT Analytics in a typical scenario where Notes administrators depend extensively on programming with Lotus script to create and analyze reports.
