

User-driven Dashboard Reports & On-demand Analysis INSIDE Lotus Notes & Domino

IntelliPRINT Dashboard Reporting is an integrated dashboard reporting & data analysis solution that has been designed specifically for Lotus Notes & Domino end users. It is a native component within the collaborative Notes and Domino framework that enables end-users to create, analyze and extend dashboard reports and widgets like charts, tables and pivot tables!

The optional IntelliPRINT Dashboard Report Analyzer add-on provides contextual analysis from the dashboard widget allowing users to perform extended data analysis operations. End users can extend the Dashboard report data and remodel it in a dynamic and user friendly way, to better present their current business situation. IntelliPRINT Dashboard Reporting can retrieve data from the Notes & Domino database in real-time and can be setup to auto-refresh data at pre-defined intervals.

IntelliPRINT Dashboard Reporting is ideally suited for organizations that want to enable end users to create their own reports in a variety of pre-defined dashboard layouts to better understand and monitor business situations, and analyze data whenever needed.

Key Benefits

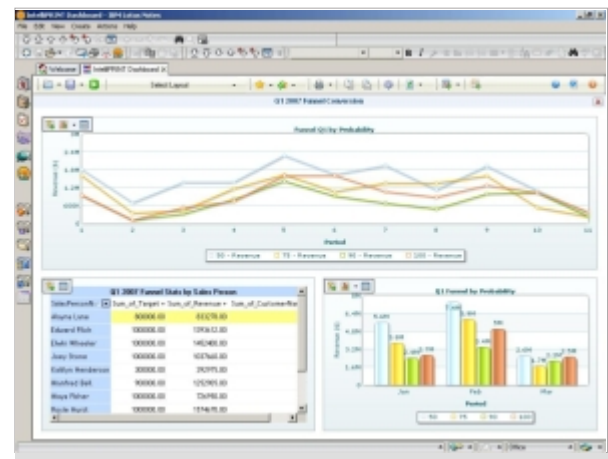

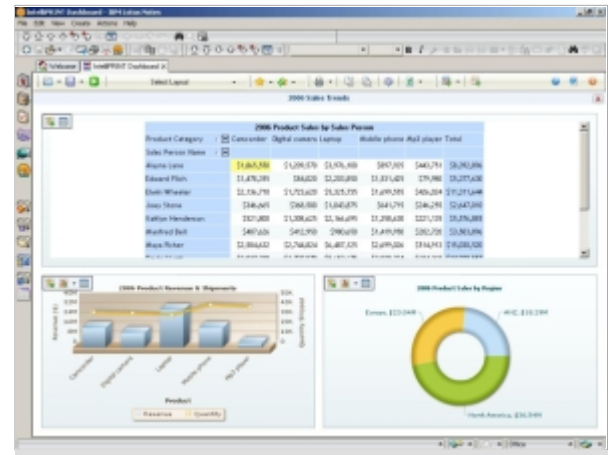

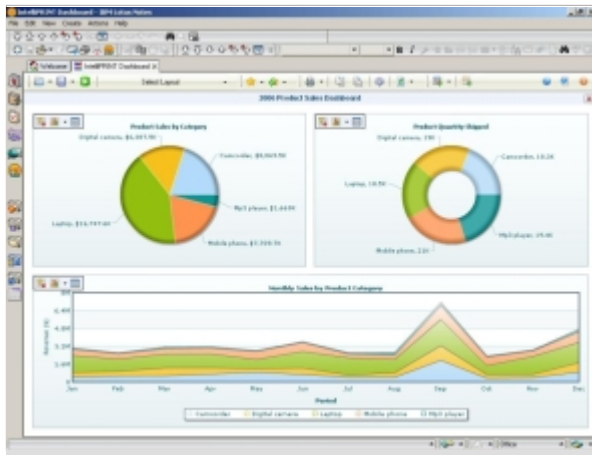

- ▶ Native dashboard reporting and data analysis component for Notes & Domino applications
- ▶ Enables end users to modify the reports, and even create few of their own and visualize, understand and monitor business situations by getting a real-time view of key business parameters
- ▶ Provides users with the ability to filter data displayed in the report in real-time to refine or isolate the data set as required by the business situation
- ▶ Widget & Dashboard Layouts enable Business users to create personalized views of complex business information
- ▶ Enables users to further analyze the dashboard data using other dimensions of the data
- ▶ Business users achieve a high level of competency with minimal training and virtually no IT overhead
- ▶ Unlocks the business value of Notes & Domino data

Features

- ▶ Wizard based Widget & Dashboard creation
- ▶ Widgets can be reused across multiple dashboards
- ▶ Simple Widgets enable end users to create real-time snapshot reports within minutes
- ▶ Dashboards combine snapshots of data from multiple Notes applications or databases
- ▶ Widget & Dashboard layouts enable users to view different representation of the same data without accessing the database
- ▶ Widget Toolbars provide quick and convenient access to commonly-performed operations on widgets
- ▶ Using the 'View Table' option for charts users can now view and explore the underlying widget data
- ▶ Dashboards can be used in presentations by exporting to image or PDF formats
- ▶ Dashboards inherit the Lotus Notes ACL Framework

Sample Dashboards

System Requirements

Client System Requirements

Minimum Hardware Requirements

CPU: Intel Pentium and compatibles
RAM: 512 MB
Required Hard Disk Space: 50 MB

Software Requirements

Operating System: Windows 2000, XP, Vista
Notes Client: Lotus Notes Client R6 or higher
Browser Client: Internet Explorer v6 or higher

Server System Requirements (Domino)

Minimum Hardware Requirements

CPU: Intel Pentium or higher and compatibles
RAM: 1 GB
Required Hard Disk Space: 500 MB (20 MB for installation files, rest for temporary workspace)

Software Requirements

Operating System: Windows 2000 Server, Windows 2003 Server
Domino Server: 6.0 or higher
