

IntelliPRINT

Unlocking the business value of Notes & Domino data!

Actionable information - A critical success factor

In today's competitive and dynamic business environment, it is imperative for business users to have ready access to real-time information and be able to rapidly respond to evolving business situations. The flexibility to instantly transform data into information that reflects the business situation is widely acknowledged as the most critical success factor for businesses.

What makes Notes applications great to build & use?

The hallmark of the Lotus Notes & Domino platform is the secure, collaborative data framework that offers identity-based, document level security that many businesses leverage. It is this ease, agility and security of data distribution that has led to the deployment of a large number of Notes and Domino applications at most organizations.

The missing element

The absence of an effective way to easily enable the instant transformation of readily available data into information within the secure and collaborative Notes & Domino framework is the limiting factor for end-users.

Introducing IntelliPRINT

The multiple Lotus Award winning IntelliPRINT offerings are native solutions for Lotus Notes & Domino that provide end users with advanced data visualization, interactivity, reporting and analysis capabilities. Trusted by the world's leading enterprises, IntelliPRINT offerings have an installed base of over 2000 customers across 80 countries.

A minimal additional investment in IntelliPRINT offerings can, not only help add cutting-edge technology to Notes & Domino applications but also drive spectacular results for the enterprise. A more visually appealing and usable

information interface enables end-users to literally unlock the business value of their Notes & Domino data and enables enterprises to achieve enhanced & immediate returns from their investments in Notes & Domino infrastructure!
