

Integrated Reporting INSIDE Lotus Notes

IntelliPRINT Reporting is an integrated Reporting solution that has been designed specifically for Lotus Notes & Domino environments. It is a native Reporting component within the collaborative Notes & Domino framework and enables organizations to deliver presentation-ready reports to users, within the workflow and security framework of their Notes applications.

IntelliPRINT Reporting provides Report Design functionality on par with industry leading solutions, with the added benefit of being a plug-and-play solution. IntelliPRINT extends the functionality of the Notes & Domino client by delivering to users the capability to work seamlessly with their e-mail, applications and reports all within the Notes client.

Notes developers or Report designers use the IntelliPRINT Reporting Designer to rapidly create an extensive array of presentation quality reports. The Reports are then saved into the respective Notes application database or a centralized Notes report database.

End users use IntelliPRINT Report Viewer, a plug-and-play extension to their Notes or Domino client for accessing reports with real-time and parameterized data. The reports are available to them within the business and workflow context of their Notes & Domino applications, greatly enhancing usage efficiency and productivity.

Key Benefits

- Native Reporting component for Notes & Domino applications
- Extensive array of report formats on par with industry leading Report writers
- Reduces report creation time by up to 80%
- Seamless report delivery to users within the context of their Notes & Domino application greatly enhancing usage efficiency and productivity
- Unlocks the business value of Notes & Domino data

Designer Features

- Wizard based WYSIWYG report design
- Visual query builder enables reporting with data from multiple Notes Views & databases
- Extensive support for report types, including charts, sub-reports and Pivot tables
- Support for Notes scripting, Formula language & expression

Viewer Features

- Reports are available as tabs within the Notes client
- Filtering support to enable reports that address specific business situations
- Reports can be exported to formats like PDF, XLS, RTF, TIF, etc.
- Users can search for specific data within reports
- Integration with Notes email allows direct mailing of reports

Client System Requirements

Minimum Hardware Requirements

CPU : Intel Pentium and compatibles
RAM : 512 MB

Software Requirements

Operating System : Windows 2000, XP, Vista
Notes Client : Lotus Notes Client R5 or higher
Browser Client : Internet Explorer v5 or higher

Server System Requirements (Domino)

Minimum Hardware Requirements

CPU : Intel Pentium or higher and compatibles
RAM : 1 GB
Free Hard Disk Space: 500 MB (20 MB for installation files, rest for temporary workspace)

Software Requirements

Operating System: Windows 2000 Server, Windows 2003 Server
Domino Server: 5.0 or higher

Sample Reports

Annual Sales By Region - 2007

Region	Product Line	Q1	Q2	Q3	Q4	Annual Total
APAC	Buy Goods	\$7,121	\$10,677	\$12,266	\$11,321	\$44,385
	Capital Equip	\$6,376	\$10,236	\$10,364	\$14,760	\$41,736

INVOICE

This is a standard invoice form with fields for Customer Name, Address, Invoice Number, and Date. It includes a table for listing items with columns for Description, Quantity, Price, and Total. The form also has sections for Terms and Conditions, and a footer with contact information.

About IntelliPRINT

IntelliPRINT natively extends the functionality of Notes and Domino clients by adding reporting, analysis and dashboard capabilities within the business and workflow context of Notes applications. Users are able to run real-time reports using IntelliPRINT Reporting, analyze data using IntelliPRINT Analytics, and visualize the state and ongoing progress of business processes using IntelliPRINT Dashboard. These solutions can be deployed on both the Lotus Notes and Domino platforms as a plugin component.
